## ABOUT

I am a software developer equipped with a passion for continual self-improvement in the field of Android development. In particular, I had the opportunity to develop from scratch on large-scale projects like the Turkcell Chatbot SDK and Paycell SDK, where I played significant roles.

In my professional experience, I have always highlighted my innovative ideas and my ability to focus on details. In every project, I work diligently to develop solutions that meet user needs and to produce high-quality software.

## EMPLOYMENT HISTORY

### Android Developer at Turkcell via FMSS

FMSS- İstanbul - 2022 - Present

#### • Turkcell Chatbot SDK

Developed the SDK from scratch for Turkcell, which provides businesses with the tools necessary to easily integrate and manage their own chatbots.

#### • Paycell SDK

Developed the SDK for Paycell, which offers mobile payment solutions, facilitating in-app purchases and mobile payments.

#### • Turkcell Atmosfer

Designed an application exclusively for Turkcell employees, aimed at simplifying daily work processes.

#### • Advicemy

Contributed to an online consulting platform featuring professionals from various fields, which offers guidance on career and personal development to users.

#### • FMSS HR

Developed a human resources application specifically for FMSS, designed to facilitate employee management and operations within the company.
